

Aero

Easy access panel

Functional and stylish vacuum packaging machine with easy access control panel. Equipped with 3-program memory, Soft Air and Sensor Control. This makes the machine perfect for catering and retail shops.

Easy, fast and precise packaging cycle

Easy to use

3 Adjustable pre-programs and sensor control make operating this machine a piece of cake.

Functional and stylish

An absolute beauty to be seen and as functional as you would want it to be: rounded corners and seamless transitions ensure an easy cleaning.

Flexible hinge system

Reduced wear and tear resulting in a longer lasting life span because of the flexible hinge system which prevents fixation and ensures that the lid is never under tension.

vacuum packaging
machines

 **Henkelman**
vacuum packaging

Extracting air, adding value

Aura

Effortlessly create perfectly vacuum-sealed products with the Aura's advanced software

Simply select the product or image on the Henkelman H-touch control panel and the Aura will switch on or off the correct functionalities. We call this ingenious vacuuming packing.

With dozens of predefined end products, the Aura enables everyone to vacuum pack every product perfectly. Functionalities such as liquid control, marinating and step vacuum are fully integrated on the Aura.

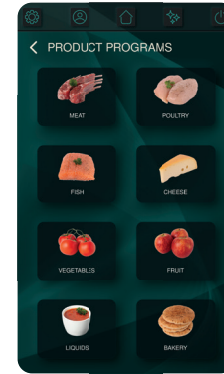

Intelligent vacuum packing with advanced soft ware

Whatever you want to vacuum pack; the Aura is equipped with a range of predefined vacuum programs for creating an optimal and professionally packaged product. By simply clicking the image of the desired end product, the innovative software ensures that the correct functions in the machine are switched on or off. You can also add or optimize vacuum programs at your own discretion. This way, the Aura follows all your packaging needs seamlessly. Every cycle again. That's ingenious vacuuming.

H-touch control panel

The Aura is the first product in our range of machines with the exclusive, advanced full-color Henkelman H-touch control panel. This makes operating the machine even easier.

This modern touch screen with images makes navigating between all options so easy you can quickly find any program you need. Then it's just click & go. This innovative user interface surely makes vacuum packaging easier than ever.

Elegant Dutch Design

The design of this vacuum sealing machine is not only extremely user-friendly, but also a feast for the eyes. The beautiful round corners and the large integrated H-touch control panel look best in open kitchens or shops.

Partly due to the seamless transition between the vacuum chamber and housing, you can easily clean this machine in accordance with all hygiene standards. This most complete table-top model from Henkelman is also prepared for connection to a gas flush system or label printer at a later date.

AURA

Ingenious vacuum packing by Henkelman: smart vacuum packing solutions that add value

Henkelman is a family business that has been helping entrepreneurs in the catering, retail and (non)food industry worldwide for 30 years to work as efficiently as possible by offering them smart vacuuming packing solutions that at the same time help them to prevent food waste.

Through our service-oriented organization and together with our global dealer network, we make Ingenious Vacuum Packing happen: smart vacuum packing solutions that add value by taking something away.

Henkelman.
Extracting air, adding value.
